

## FUTURE CLASSROOM: STUDENT-CENTRIC

This model utilizes the teacher as mentor, problem solver, and support person. The focus for this "floating" teacher is on serving individual students who are learning at their own pace.

## BRIDGING THE GAP

While academics argue the specific classifications, the next generation in education needs to accommodate the broad spectrum of learning types.

## USER-GENERATED SOFTWARE

As students use online courseware, they can customize it for other learners. They can even give feedback and include a rating for their peers.
